Hi Tanya
Ok would 2:00 be ok?
Thanks
Mike

Importance: High

Hi Mike,

I'm glad you are having decent weather for your field work this week. If possible, can you give me a call tomorrow afternoon. I would like to discuss if you have any concerns with the analytical results from an eco-perspective. Also, I would like to discuss samples SS-162, SS-163, and SS-164 on map 4b in the southern portion of the site. These samples were originally requested to assist with the eco risk assessment.

Let me know what time is good for you.

Thanks,
Tanya
